## INFORMATION REPORT

REPORT NO. [REDACTED]

CD NO. 25X1A

COUNTRY Germany (Russian Zone)

DATE DISTR. 1 August 1952

SUBJECT Zeiss A-1 Devices in Zerbst

NO. OF PAGES 1

PLACE 25X1A

ACQUIRED [REDACTED]

NO. OF ENCLS.  
(LISTED BELOW)DATE OF  
INFO. [REDACTED]SUPPLEMENT TO  
REPORT NO. 25X1X

1. [REDACTED] (fmu) Verbin, a Russian captain, conferred with three Zeiss-Jena officials, Dr. Ernst Guyenot, Dr. (fmu) Rode and (fmu) Jahn, about the break-down of one of the two A-1 aerial training devices which Zeiss had installed at Zerbst (M52/D98). The faulty device had been in operation about 18 months and had run about 100 hours. [REDACTED] there had been no trouble with the other A-1 device. 25X1A

2. Guyenot gave Verbin instructions on how to repair the faulty device and pointed out that several possible causes of break-down covered in the repair manual had not been explored. Verbin requested that a Zeiss technician accompany him to Zerbst, in case he should be unable to repair the machine himself from instructions given by Guyenot. It is not known whether the request was granted.

3. [REDACTED] Zeiss had had to repair only one of the four sample A-1 devices installed at Lobstedt during their test period.\*\* 25X1A

25X1A [REDACTED] Comment: Guyenot is probably identical with Dr. (fmu) Guynot, who, [REDACTED] was reported to be in charge of the electrical phase of the construction of the A-1 device at Zeiss 25X1A

[REDACTED] Comment: Lobstedt near Jena (M51/J76)

25X1A
